

KASHEFYAR

CaTNo.BDK-9910

Drugs and Psychotropic Substances Identification Rapid Kit

Kashefyar tests are used to presumptively identify whether the substance being tested is the narcotic drugs of psychotropic substances or not.

Kashefyar identify **10** narcotic drugs and psychotropic substances via visual color changes of the reagent in the ampoule test. Depends on the type of drugs, the variety of color changes produced in **10** seconds.

Advantages

- Fast and easy to use
- One step test (one ampoule for each test)
- Very little sample is needed
- High reliability and consistency
